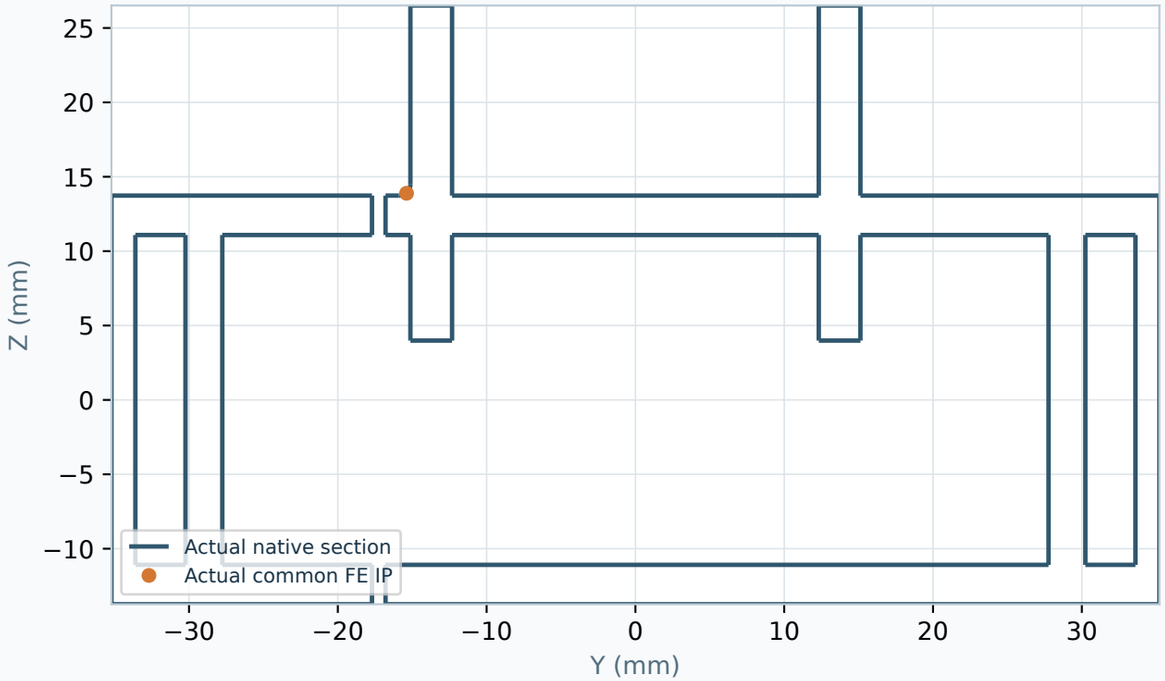
993 TURBO · R1 · ACTUAL NATIVE SECTION

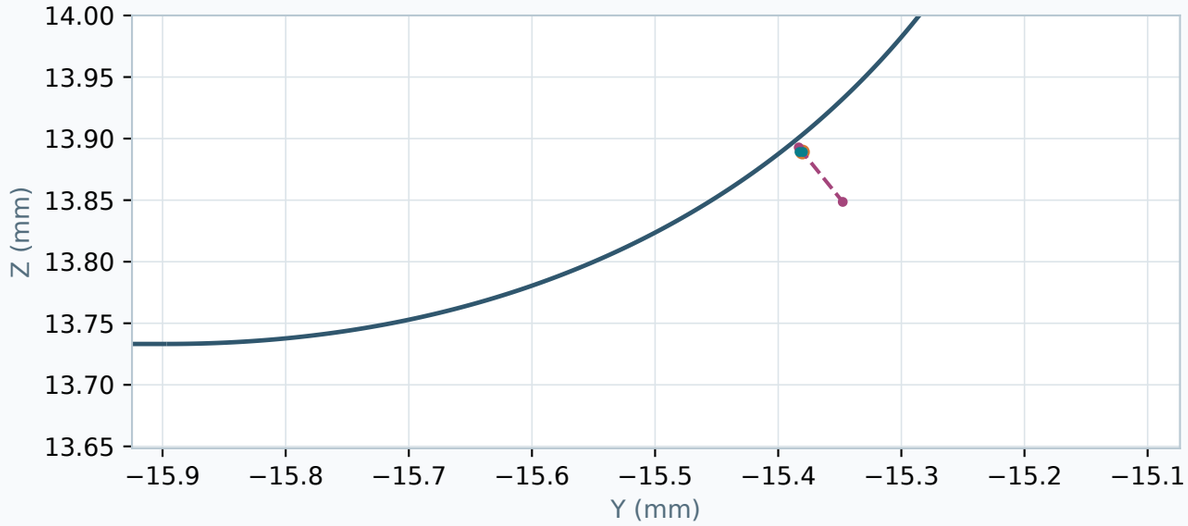
Geometry at the actual R1 stress peak

X = 83.39717404347466 mm · common element 83728 / IP1 · one native BREP

Whole native section



Actual peak-element bounds · Y–Z projection



Dashed segments are Y–Z projections of measured 3D normal chords.

Their endpoints generally have different X values. These lengths are not thicknesses of the displayed section.

Face 60 → 62: 3D normal chord 0.085913084 mm; endpoint X = 83.391775043 → 83.456170908 mm

Face 62 → 60: 3D normal chord 0.067453672 mm; endpoint X = 83.454739085 → 83.387341531 mm

All 41 native curves / 1833 samples retained · 0.001 mm drawing deflection · no new CAD, FEA or global thickness claim
