993 TURBO · C1 JUNCTION / WINDOW BOUNDARY · ACTUAL CAD SECTION

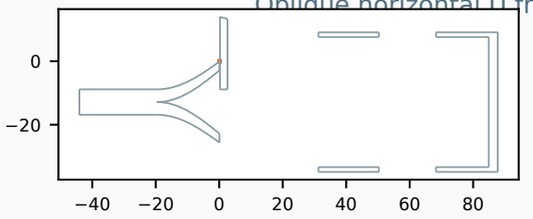

The C1 fillet end at the window boundary

Section containing the native normal ray and Z · source: coarse peak 84037/IP1, before H2 refinement

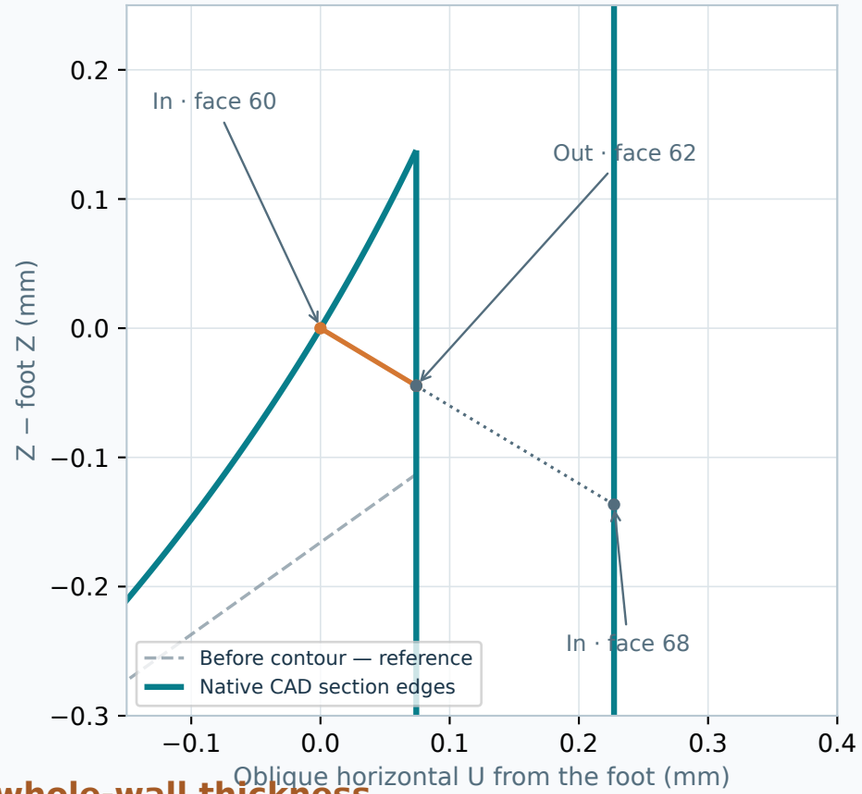

BEFORE · reference STEP

Zoom location in the complete section

AFTER · native C1 BREP master, R1

Coarse-peak ray: local chord, not whole-wall thickness

In60 → Out62: 0.086520 mm inside material; re-entry In68 at W = 0.265083 mm.

Native contours; local added/old membership unmeasured. H2 peak not shown; STEP exchange refused.

Complete native edges sampled for drawing (0.001 mm). Display crop only; no whole-wall or global minimum-thickness measurement.
