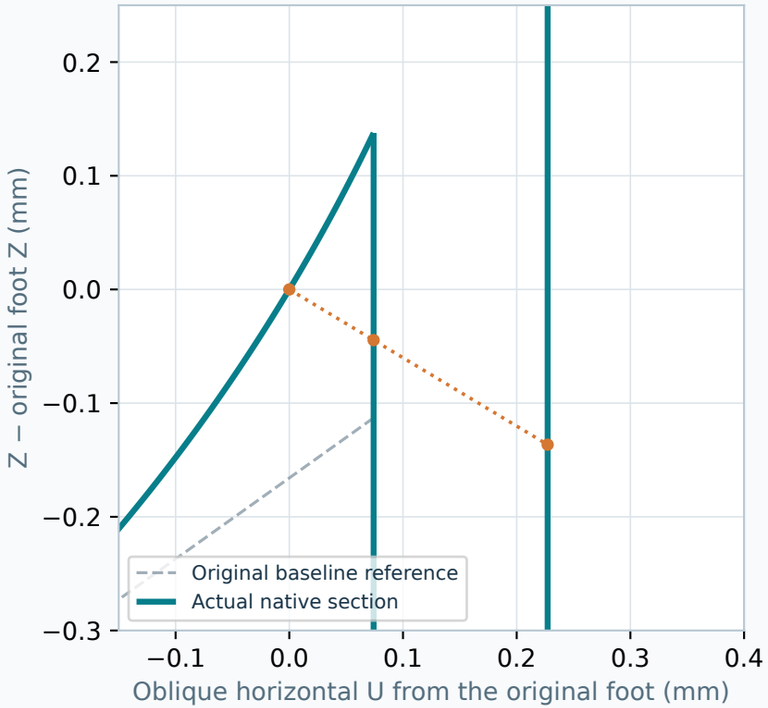
993 TURBO · PRESERVED TAPER / ORIGINAL C1 · ACTUAL NATIVE SECTIONS

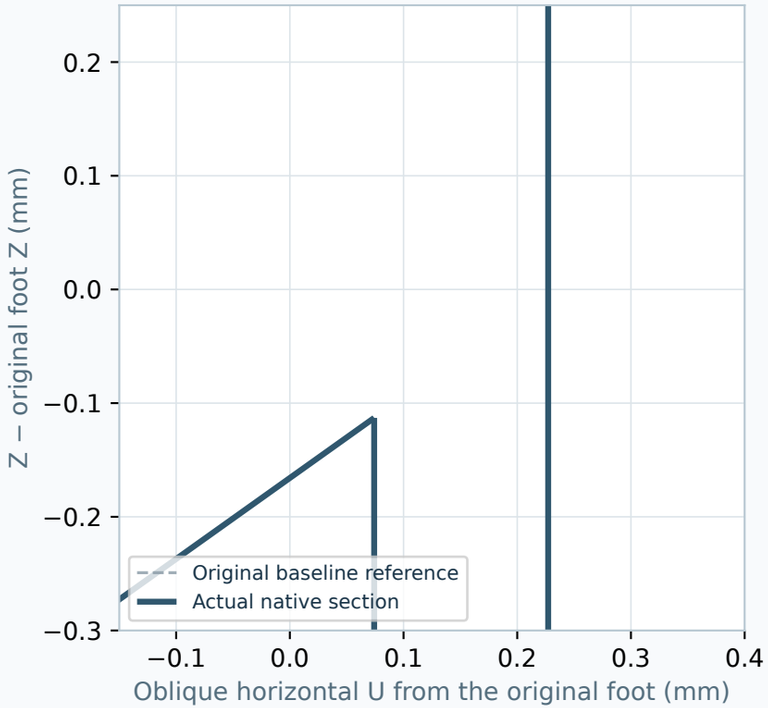
What changed at the C1 fillet end?

Same closed oblique plane through coarse peak 84037/IP1 · shared U/Z coordinates · baseline reference reused

ORIGINAL C1 · closed profile



TERMINAL TAPER · preserved raw BREP



Orange reference ray belongs ONLY to original C1.

No taper normal ray or chord was computed. These profiles do not establish a wall thickness or strength result.

Raw taper Build succeeded; the original post-Build law gate refused. Candidate remains unqualified; downstream gates stay separate.

All native section curves retained; 0.001 mm drawing deflection, common display crop. No old CAD replay, CAD rebuild, remesh or FEA.
